

CIM Aesthetics Treatments & Services

Fractora: A fractional skin resurfacing and subdermal tissue coagulation device that bridges the gap between fractional lasers and surgical procedures. With outcomes such as: improvement in skin complexion, reduction in skin irregularities, and restoration of skin to a more youthful appearance.

BodyFX: Addresses problematic fatty tissue in larger body areas such as the abdomen, back (flanks), and thighs. BodyFX works by using different clinically proven modalities including radio-frequency energy and negative pressure applied to the skin and underlying fat. BodyFX also improves the appearance of cellulite and tightens skin!

Forma: The first auto-adjusting, non-invasive, thermal skin treatment for deep and uniform tissue stimulation. Forma uses radio-frequency power that flows uniformly between the electrodes to provide a comfortable thermal experience with immediate and subsequent contraction. There is no downtime in this effective "lunch-time" procedure that will make anyone look years younger!

Diolaze: Our hair removal technology covers a large treatment area, making treatments convenient and fast. During laser treatment, a diode laser beam is targeted towards the hair follicles. The penetrating energy then heats up the root of the hair, destroying it, which prevents future hair growth.

Lumecca: A breakthrough intense pulsed light (IPL) that delivers up to 3X more energy in the 500-600 nm range to improve efficacy for vascular and pigmented lesions. Sun damage, age spots, freckles, rosacea, and red vessels are no match for Lumecca!

Facials: A skin treatment that cleanses pores, exfoliates away dead skin cells, and treats common skin concerns with a custom mask. This multi-step process is meant to rejuvenate, nourish, & hydrate making skin appear healthier and younger. Enjoy a stress free and calming environment while our Esthetician pampers your skin!

BODY *fx*

Discover a superior solution to improve the appearance of cellulite, reduce dimpled skin, loss of elasticity on the abdomen, love handles, hips, thighs and other areas that require fat reduction.

WHAT IS BODYFX?

BodyFX is a new, long lasting, non-invasive solution to reduce the unsightly appearance of cellulite. BodyFX will reshape your body to provide a non-surgical alternative to liposuction.

BodyFX is the perfect solution to get rid of your mummy tummy or muffin top, and improve your general body contour.

HOW DOES BODYFX WORK?

BodyFX uses a combination of different clinically proven modalities including radio-frequency energy, deep tissue heating, and suction coupled negative pressure.

The radio-frequency energy distributes heat to the skin and underlying fat, causing the tissues to heat and contract. The vacuum and controlled energy pulses then work synergistically to provide beautiful body shaping results.

BODY SHAPING AND CELLULITE TREATMENT

"I lost inches in my thighs and my body looks and feels tighter. I would recommend this treatment to anyone who wants to get rid of that little extra fat they are carrying."

- SUSAN, PATIENT

HOW SAFE IS THE TREATMENT?

A series of radio-frequency energy is delivered by a succession of pulses at 1 million cycles per second. While this may sound intense, it is very safe. To maximize comfort, the body's temperature will be constantly monitored, with ongoing accurate feedback of the skin's temperature. This thermal monitoring provides the utmost in temperature control.

DOES IT HURT?

Most users find BodyFX comfortable. During treatment you can expect a warming of your skin and gentle pulling sensation as the radio-frequency and vacuum work to smooth out unwanted stubborn pockets of fat.

HOW MANY SESSIONS ARE REQUIRED?

It is recommended that weekly sessions are performed over an eight week period. Gradual improvements in the treatment area can be seen following the first few treatments – with the skin's surface feeling smoother and softer immediately.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is absolutely no downtime for BodyFX. It can be a lunch time procedure. Patients will notice redness and warmth in the treated area which will subside after a few hours. This warmth is equivalent to the sensation felt after a deep tissue massage and will not prevent anyone from their regular activities.

MINI *fx*

Discover a superior non-invasive solution to improve the appearance of cellulite, dimpled skin, and loss of elasticity in small areas

WHAT IS MINIFX?

MiniFX is a new non-invasive solution to reduce the unsightly appearance of cellulite. MiniFX targets small areas requiring fat and cellulite treatment.

HOW DOES MINIFX WORK?

MiniFX uses a combination of different clinically proven modalities including Radio-frequency energy, deep tissue heating and suction coupled negative pressure. The Radio-frequency energy distributes heat to the skin and underlying fat, causing the tissues to heat and contract. The vacuum and controlled energy pulses then work synergistically to provide beautiful shaping results.

TARGET PROBLEMATIC AREAS TO TIGHTEN AND TONE.
IDEAL FOR THE NECK AND SMALL BODY PARTS.

"I had a few deep dimples on my thighs that were bothering me when I wore a bikini or short shorts. MiniFX was a very comfortable, easy treatment that gave me my confidence back. Now the back of my thighs are very smooth and match the rest of my body! I couldn't be happier with the results."

- J.L. PATIENT

HOW SAFE IS THE TREATMENT?

A series of RF energy is delivered by a succession of pulses at 1 million cycles per second. While this may sound intense, it is very safe. To maximize comfort, the temperature will be constantly monitored, with ongoing accurate feedback of the skin's temperature. This thermal monitoring provides the utmost in temperature control.

DOES IT HURT?

Most users find MiniFX comfortable. During treatment you can expect a warming of your skin and gentle pulling sensation as the radio-frequency and vacuum work to smooth out unwanted stubborn pockets of fat.

HOW MANY SESSIONS ARE REQUIRED?

It is recommended that weekly sessions are performed over an eight week period. Gradual improvements in the treatment area can be seen following the first few treatments – with the skin's surface feeling smoother and softer immediately.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is absolutely no downtime for MiniFX. It can be a lunch time procedure. Patients will notice redness and warmth in the treated area which will subside after a few hours. This warmth is equivalent to the sensation felt after a deep tissue massage and will not prevent anyone from their regular activities.

FRACTORA

Discover a superior solution to improve your skin complexion, reduce skin irregularities and reveal a younger looking you all in one treatment.

WHAT IS FRACTORA?

Fractora skin treatment is a fractional resurfacing treatment that remodels collagen to help restore skin to its youthful appearance. Fractora lets you look and feel younger.

WHAT AREAS CAN BE TREATED?

Fractora can be used on any area that can benefit from skin resurfacing. The most commonly treated areas include: lower eyelid, upper eyelid, smile lines, forehead, cheeks, mouth and neck. Face and body areas that exhibit aging skin, discoloration or acne scarring are suitable for treatment.

HOW MANY TREATMENTS WILL I NEED?

Depending on your Fractora treatment regime you can expect to have between 1-6 sessions.

RESURFACE YOUR SKIN & REMODEL COLLAGEN

"It has brought a restorative look to my skin and I feel really good. I have achieved that youthful glow that I was hoping to get, and I'm really happy."

- RUTH | PATIENT

HOW QUICKLY WILL I SEE RESULTS?

Visible results can be seen immediately, but typically after two weeks the most noticeable results appear. Improvements continue up to three months after treatment.

WHAT IS THE BENEFIT OF FRACTIONATED ENERGY?

Fractionated RF energy found in Fractora is a scientifically proven method to remodel skin. It is minimally invasive, using a matrix of micro pins to resurface the skin, providing exceptional results with almost no patient downtime.

CAN ANYONE USE FRACTORA?

The benefit of Fractora's color blind technology is that it can be used on all skin types. The unique properties allow even darker tones to receive treatment.

WHAT IS THE BENEFIT OF RF ENERGY?

RF energy heats the deep layers of the skin in a controlled way to revitalize the collagen. The treatment will improve skin complexion and texture for a more radiant and youthful appearance.

CAN THIS BE USED IN COMBINATION WITH OTHER TREATMENTS?

Fractora can be used in the same treatment session, or a few days after other treatments. Fractora can also be combined with additional InMode energy treatments or injectables to achieve a more extensive full face result.

WHEN CAN I PUT MAKE-UP ON AFTER TREATMENT?

Since patient downtime is minimal, makeup can be applied 1 to 2 days after the treatment. Patients should expect to see micro lesions a few days after treatment and slight redness for up to 1 week depending on treatment parameters.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

Patients should moisturize the treatment area and avoid direct sun exposure. It is also recommended that patients use a good, broad spectrum sunscreen every day. In addition to reducing their future risk of skin cancer, sunscreens also reduce wrinkles and slow the aging process.

Please speak to your aesthetic provider to see if you are a candidate.

FORMA

Improve the skin's overall appearance with smoother skin and a more radiant glow.

WHAT IS FORMA?

Forma uses bipolar radiofrequency technology to provide optimal skin remodeling treatments to improve the appearance of your skin.

HOW DOES FORMA WORK?

Forma was developed based on the clinical success of the proprietary A.C.E. (Acquire, Control, Extend) technology. A.C.E. technology uses radiofrequency energy to target deep layers of the skin, with no area being under or over treated. This ensures maximum and consistent results.

IS FORMA FOR ME?

Forma is suitable for all skin types and is appropriate for individuals seeking a non-invasive and a natural looking approach to achieve a younger appearance without surgery, scars, or downtime.

DISCOVER THE APPEARANCE OF YOUNGER LOOKING SKIN!

"My Forma treatments improved my overall complexion without any pain or downtime. It is a great alternative to expensive procedures. I love the way my new face looks."

- JANE | PATIENT

WHAT AREAS CAN BE TREATED?

Forma can be used on both the face and body. Commonly treated areas on the face include: forehead, crows feet, upper eyelids, lower eyelids, nasolabial folds, jowls, smile lines and neck. On the body, popular treatments consist of the arms (bat wings), abdomen and other areas that may need more refinement.

FORMA on EXTRA!

IT'S COMPLETELY PAINLESS AND THERE IS NO DOWNTIME.

WILL IT HURT?

Forma is an essentially painless procedure with no downtime due to its precise technology and deep-layer targeting of the skin. Slight redness in the treatment area is common post-procedure, which subsides within a few hours.

HOW MANY SESSIONS ARE RECOMMENDED?

It is recommended that weekly sessions are performed over a six-week period. Individuals may be treated in fewer sessions with more weeks between each treatment. Scheduling should be based on a medical pre-evaluation.

CAN THIS BE USED IN COMBINATION WITH OTHER TREATMENTS?

Yes, Forma can be used in combination with most other laser treatments, facials, injectables and/or filler. Please speak to your aesthetic provider when considering combining Forma with other treatments.

THE CONSULTANT CLINIC

REVANESSE® LIPS™+ WITH LIDOCAINE IS INDICATED FOR SUBMUCOSAL IMPLANTATION FOR LIP AUGMENTATION IN PATIENTS 22 YEARS OF AGE OR OLDER.

IMPORTANT SAFETY INFORMATION

Bleeding: Bleeding is usually minimal and resolves within a few minutes. It is possible to have a bleeding episode from the injection of the local anesthesia or filler that requires treatment, but it is unusual. Bruising in the area is also an expected reaction and can take up to a week to resolve.

Swelling: Swelling is also expected and may take several days to a week to resolve. It is unusual but medical treatment may be necessary if swelling is slow to resolve.

Pain: Some discomfort is expected with injections but usually lasts less than a day.

Other risks that are less likely, that may occur, include but are not limited to, skin hypersensitivity, necrosis, rash, redness, hardness, lumpiness, and skin infection. As with using any dermal filler, there is a risk of allergic reaction. If you experience a serious allergic reaction, please seek medical help.
